

## **Biographie** **Adel Al Hazmi**

Senior IT/IoT Architect, T-System International GmbH

Dr. Adel Al-Hezmi received his PhD in 2011 and MSc in electrical engineering in 2003 from the Technische Universität Berlin with specific emphasis on telecommunication engineering and networks.

Al-Hezmi has more than 17 years of international experience in the areas of telecommunication, IT, and multimedia. He has expertise in M2M/IoT, software development, enterprise architect and telecommunication. He worked with different international players in different vertical domains (e.g. Telecommunication, automotive, smart city, etc.) by providing them with technical advisory services to help in the IP transformation and the development of several service platforms.

He started his carrier at Fraunhofer FOKUS where he led the R&D of NGN/IMS-based multimedia content delivery and emerging technologies. He worked at STC (Saudi Telecommunication Company) from 2008 to 2010 in Saudi Arabian and moved to Qatar Mobility Innovations Center (QMIC) in Qatar till 2012. Then he led the development of the OpenMTC Platform from 2012 to 2016 at Fraunhofer Institute FOKUS in Berlin. Currently, he works at T-System International GmbH as a senior IT/IoT architect.
