Wassim Trojet

Head of the Cybersecurity and Network academic program and infrastructure at ESIGELEC, France

Dr. Wassim TROJET is the Head of the Cybersecurity and Network academic program and infrastructure at ESIGELEC high engineering school, Rouen, France. He holds a permanent position as IT Associate Professor at the same school. He carries out his research at the Embedded Electronic Systems Research Institute (IRSEEM), host laboratory of Rouen University, France.

Dr. Wassim TROJET graduated his PhD and Master in Computer Science at the University of Aix-Marseille, Marseilles, France. His primary research focused on the integration of formal methods (mathematic based techniques) in discrete event simulation models in order to improve their credibility and consistency. This integration allows establishing safer system designs and more secure applications.

Dr. Wassim TROJET is actually interested in security and safety issues in green intelligent transportation systems, especially the internet of electric vehicles. Several research programmes (French, European and International) have funded his research activities.
